

CUDO (Board Game)

Mind Mapping

Problem Identification

- Print or digital medium alone to raise awareness is not so effective with childrens.
- Safety measure and Do's & Don't are difficult to be retained by childrens.
- Teaching Childrens without play is a slow process.
- Lack of engaging games that can raise awareness about CIVID 19.
- During the nationwide lockdown children have less option of games.
- Multiple kids can't play together while ensuring Social distancing.

Concept

This board game aims to promote learning through play among children to create awareness about coronavirus while insuring social distancing.

+

= CUDO (Board Game)

Feedback of users

This game is quite a time-taking, to finish it we need an hour because of that we lose interest after half an hour.

The rules of the game is confusing.

Adding before playing is quite challenging.

Take-care of this game is quite painful because of the split board.

Visual and colors are dull. There is no clarity.

The second (center) part of the game is not adding value apart from compelling them to be seated at distance.

Changes after feedback

Now game time is less than half an hour.

The rules of the game are simplified and added signifiers.

The game open and close is simpl just like a book.

The visual and colors of the game are vibrant and added simple graphics for clear visibility.

Center part of the game is part of the game where players will have to complete 100 to 125 and it also compelling players to maintain social distancing.

Rules to Play

- Maximum 4 players can play at a time.
- Each player will have to complete steps 1 to 125.
- If a player comes in the box where he got safety equipment in this case he will get a reward to jump forward according to aero.
- If players come in coronavirus box, he will get infected and he will have to go in lockdown.
- There are three-zone of lockdown green, orange, and red. The player will have to go in the box according to the color of coronavirus he got infected.
- To get out of lockdown he will have to follow the instruction of aero.
- Green zone players can move directly, orange zone players will have to disinfect first then move, and red zone players will have to get treatment in hospital and he will have to get disinfect to move forward.
- A player who will reach first at home will win.

Advantages

Designed to make children learn all about Coronavirus Prevention and safety in a fun way. When children learn while playing they don't forget.

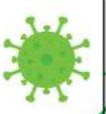

It promotes healthy competition of good safety habits among children.

This game has been designed to ensure social distancing while playing.

It helps in the holistic development of a child and make them sensitive towards safety from Coronavires.
