

UNRAVEL

A COVID-19 INTERACTIVE FURNITURE DESIGN TO MANAGE CROWD IN PUBLIC PLACES.

NEED OF THE HOUR

With covid-19 being the new talk of the town, in the worst way possible, the world right now feels like a war zone, where we are our own worst enemies. This lockdown is not going to stay forever and we are eventually going to start to go on and about with our daily lives. But, this lockdown has given us a lot of time introspect, we have realized that post lockdown, a revolution is inevitable, in all aspects of business and design.

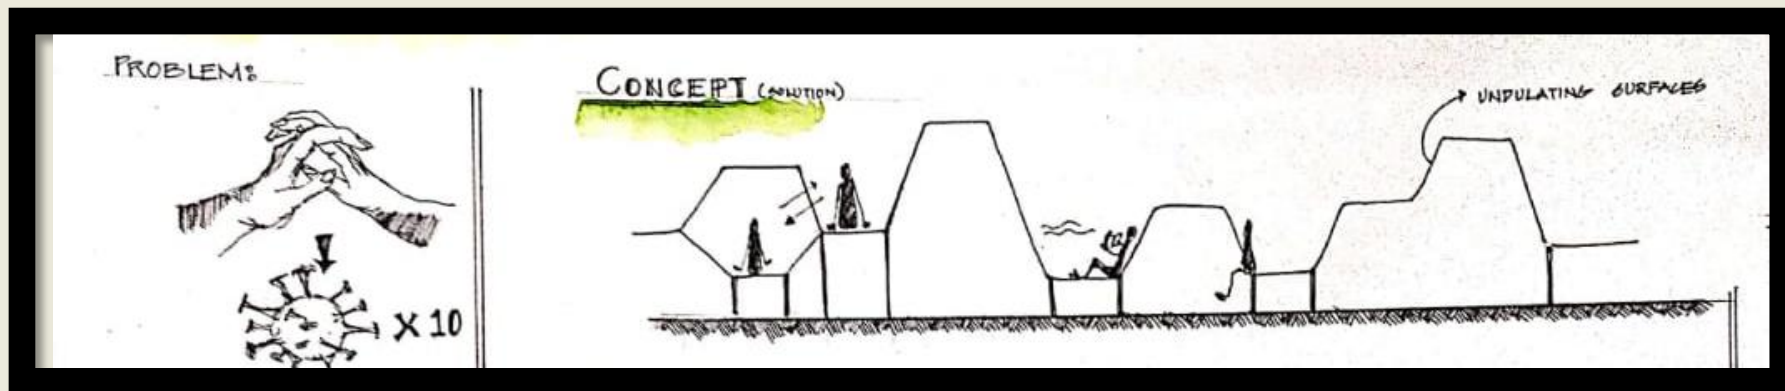

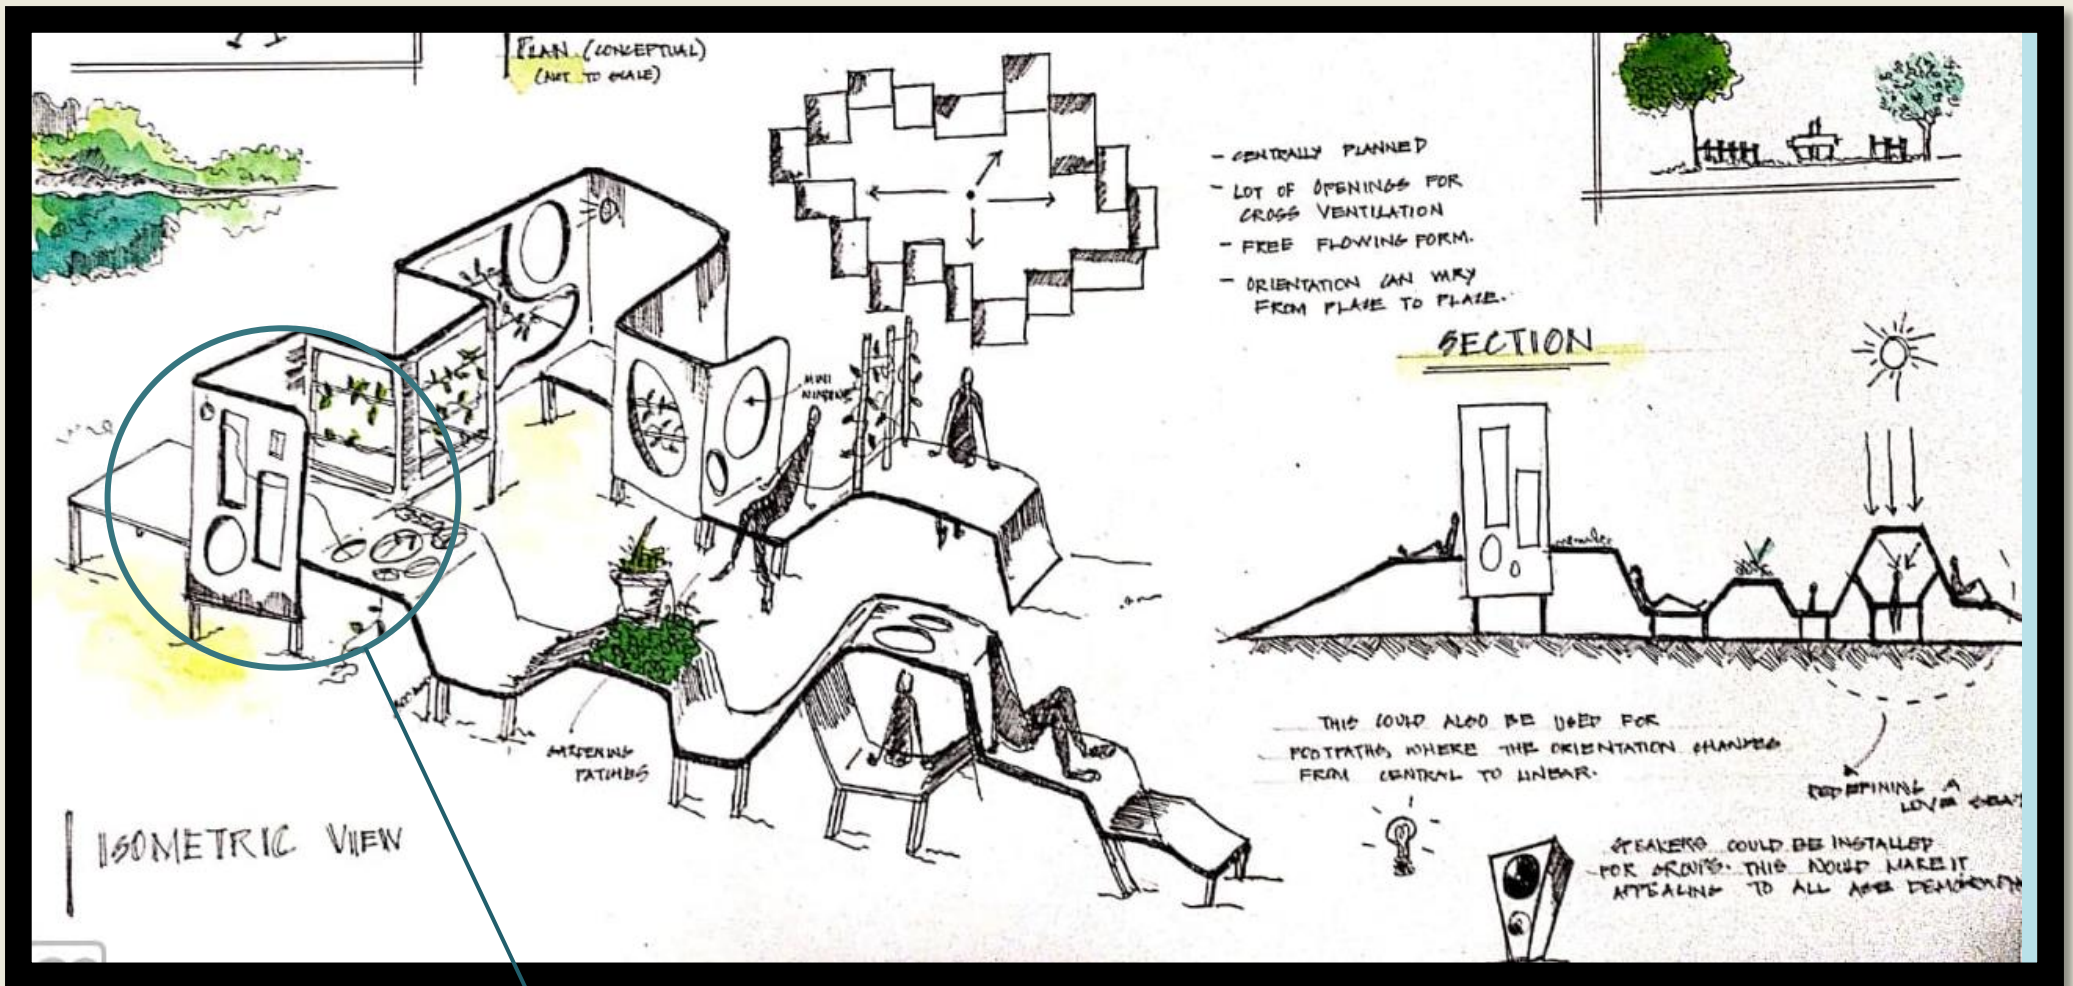

UNRAVEL.

What is unravel all about? Unravel is this interactive design with undulating which allows the user to interact with other users and at the same time having barriers in between. Barriers which don't hinder your interaction, in fact encourage the user to engage in some more.

CONCEPT:

We make use of undulating surfaces to create level differences which would help in reducing physical contact thereby, also reducing chances of further contamination.

This could be a modular unit.

Views and sections- process drawings.

This is what the initial idea was, I developed on it further. This could be oriented and arranged in any way possible.

VIEWS

This is what the final product would look like, obviously, this can be modified further and is an extremely flexible design.

UNRAVEL- A JOURNEY

With this design, one can think of multiple ways of arranging it. It could have new inbuilt technology incorporated into it. For example, Bluetooth speakers could be installed to let the group play songs of their choice.

LOCATIONS THE PROJECT COULD BE INSTALLED AT:

- 1.PARKS
- 2.STREETS
- 3.PRIVATE RESORTS/ ESTABLISHMENTS
